

Haridwar-Trip-with-LPU

This project is a web application that allows applicants to book a trip from the LPU (Lovely Professional University) campus to Haridwar. The main feature of the application is a form that collects various details from the applicants to confirm their booking. This README provides an overview of the project and instructions for setting it up and running it locally.

Features

The Haridwar-Trip-with-LPU project offers the following features:

- **User-friendly web interface:** The application provides a clean and intuitive web interface for users to fill out the booking form.
- **Booking form:** The form collects essential details from applicants, including their name, contact information, and any additional requirements.

Technologies Used

The project is built using the following technologies:

- **Front-end:**
- HTML, CSS
- Back-end:
- php

Setup

To set up the project locally, follow these steps:

1. Clone the repository:

2. Install the dependencies:

3. `cd` Haridwar-Trip-with-LPU

```
npm install
```

4. Set up environment variables:

- Create a `.env` file in the root directory of the project.
- Start the application:

```
npm start
```

The application will be accessible at <http://localhost:3000>.

Usage

To use the Haridwar-Trip-with-LPU application, follow these steps:

1. Access the application by visiting <http://localhost:3000> in your web browser.
2. Fill out the booking form with the required details.
3. Click the "Submit" button to submit your booking.
4. If the form is filled out correctly, you will receive a confirmation message on the top of page.

Contributing

Contributions to this project are welcome. If you find any bugs or have suggestions for improvement, please open an issue or submit a pull request. For major changes, please discuss them first by opening an issue.
